

Triggers Chicago

What works well – best practices

What are the challenges – identified gaps

Potential solutions/actions

Triggers Chicago

What works well-best practices?

- **Advanced preparation (Weather, ready for communication and planning)**
- **Advanced notification of incoming flights. (Advanced notification when airports are constrained for weather, equipment, etc,..)**
- **List of available services provided**

Triggers Chicago

What works well-best practices?

- **Continue to monitor weather conditions**

Triggers Chicago

What are the challenges – identified gaps?

- **Notification. Who initiates the call and who is called**
- **Time constraints. How much lead time do we need or require**
- **Limited space and services**
- **Outgoing feedback from airports when they are full**

Triggers Chicago

Actions:

- **Interactive website. Each airport would provide information about assets available (space or slots, equipment, time of operation, Customs, etc)**
- **Subscribe to the OIS page and tailor it to your needs(Advisories, hotline information, airport issues, etc)**

Triggers Chicago

Actions:

- **ORD Aviation Weather Portal listed below.**
http://www.crh.noaa.gov/lot/?n=ord_portal
