CDRs are available for the most common Caribbean destination city pairs. To see if a CDR is available for a Caribbean Destination, check the DSP routes page using Kxxx as the departure airport (ex KJFK), or look in the left hand column next to the route,: if a CDR is available, the first letter of the departure airport appears in that column

When entering a CDR for Caribbean destinations (when available), the first character is the first letter of the departure airport, followed by the 7 character CDR code, ie JFK to MDPP via CDR MDPP451 the input would be would be AM 6 JFK 10 JMDPP451↓
